Confidential – Internal Use

Register Version 1.0 · Effective date: October 2026

1. Purpose and Document Control Rules

This register is the single source of truth for all controlled documents at LaunchPoint Growth — policies, standard operating procedures (SOPs), plans, registers, and templates. It ensures consistent naming, version control, ownership, approval, and scheduled review so that employees always use the current, approved version.

Naming convention

Document IDs follow the pattern: **LG-[AREA]-[NN]** where AREA is a short code (POL = Policy, SOP = Procedure, PLN = Plan, REG = Register, FRM = Form/Template, REF = Reference) and NN is a sequential number. Titles are plain language. File names should match: e.g. *LG-POL-01_Code_of_Conduct_v1.0.pdf*.

Version numbering

- Major changes (scope, policy intent, structural rewrite): increment major number — e.g. 1.0 → 2.0.
- Minor changes (clarifications, corrections, contact updates): increment minor number — e.g. 1.0 → 1.1.
- Drafts use a draft suffix until approved (e.g. 1.0-DRAFT). Only approved versions appear as Current in this register.

Status definitions

- **Current** — Approved and in force; this is the version to use.
- **Under review** — Scheduled or ad-hoc review in progress; current version remains in force until replaced.
- **Superseded** — Replaced by a newer version; retain for history only.
- **Retired** — No longer applicable; archived.
- **Draft** — Not yet approved; do not use for operations.

Review cycle

Unless noted otherwise: Policies and Plans — review annually; SOPs and Forms — review annually or after a significant process change; Registers — update continuously and review the control framework annually. The Owner is responsible for initiating review before the Next Review Date. Approval Authority signs off before a new version is marked Current.

4. Ownership and Approval Matrix

Default ownership and approval authority by document type. Specific documents may list a different owner in the master register; this matrix is the default when not otherwise stated.

Document type	Typical Owner	Approval Authority	Notes
Policy (LG-POL-xx)	COO or relevant Head	CEO (or COO for operational policies)	Annual review; CEO for ethics, security, major risk
Plan (LG-PLN-xx)	COO or plan sponsor	CEO	Strategic plans require CEO approval
SOP (LG-SOP-xx)	Process owner (Head / Ops)	COO	CEO for security and high-risk SOPs
Register (LG-REG-xx)	Ops Coordinator or COO	COO (CEO for this master register)	Living documents; control framework reviewed annually
Form / Template (LG-FRM-xx)	Process owner	COO	Minor field changes may be approved by Owner

5. How to Maintain This Register

- **New document** — Assign next ID in series, complete all register fields, obtain approval, set status to Current, store file in the controlled repository with the standard file name.
- **Revision** — Update version number, record change in the Revision History Log, obtain approval, mark previous version Superseded, update Next Review Date.
- **Review with no change** — Update Last Review Date and Next Review Date; note “reviewed, no change” in the history log.
- **Retirement** — Set status to Retired, record reason and date in history, move file to archive location.
- **Access** — Current versions are available to all employees in the shared controlled-documents folder. Drafts and superseded versions are restricted to Owners and Approvers.
- **Responsibility** — COO owns this register. Operations Coordinator supports day-to-day updates. Document Owners are accountable for content accuracy and timely review.
