SECURITY MEASURES SOP

Standard Operating Procedure — Physical Security, Asset Protection & Workplace Safety

DOCUMENT OWNER	EFFECTIVE DATE	VERSION	CLASSIFICATION
Operations & Security	**[Current Date]**	**1.0**	**Internal Standard SOP**

1. OFFICE ENTRY, EXIT & VISITOR CONTROLS

Physical security controls are established to prevent unauthorized entry, protect staff, and safeguard corporate assets.

- **Access Control & Keycards:** All staff must display company ID badges at all times. Access cards are non-transferable and must never be loaned to colleagues or visitors.
- **Tailgating Prevention:** Employees must ensure non-authorized individuals do not follow them through keycard-controlled doors.
- **Visitor Registration:** All guests must sign in at reception, state their business, receive a temp visitor badge, and remain escorted by a designated host at all times.
- **Facility Opening & Closing:** Designated keyholders are responsible for disarming and arming the alarm systems during facility opening and closing. Perimeter doors must remain locked after regular hours.

2. ASSET & CONFIDENTIAL DOCUMENT PROTECTION

> **Clean Desk & Secure Storage Mandate:** All sensitive documents, financial records, client credentials, and storage media must be locked away in fireproof cabinets when left unattended or at the end of the day.

- **Physical Hardware Security:** Laptops and portable hardware must be secured with Kensington locks when left in unmonitored areas overnight. Personal devices are not permitted in restricted zones.
- **Document Disposal:** Paper files containing confidential info or PII must be placed directly into locked shredding bins for cross-cut destruction. Never discard sensitive papers in regular waste.
- **Equipment Removal:** Removing hardware or physical assets from office premises requires a signed Asset Check-Out Form approved by Operations.

3. CCTV & WORKPLACE SURVEILLANCE GUIDELINES

CCTV systems operate to enhance physical security, deter illegal activity, and assist in safety investigations in compliance with privacy laws.

- **Monitored Areas:** Cameras are restricted to public access points, building entrances/exits, server rooms, reception areas, and primary corridors.
- **Privacy Safeguards:** Surveillance is strictly prohibited in private restrooms, changing areas, or dedicated breakrooms.
- **Data Access & Retention:** Footage access is restricted to authorized Security Personnel. Footage is retained for 30 days before automated deletion unless flagged for an active investigation.

4. EMERGENCY EVACUATION, FIRE & HEALTH SAFETY

Every employee must be familiar with life-safety protocols and emergency exit routes within the facility.

- **Fire Safety & Alarm Response:** Upon hearing a continuous fire alarm, all personnel must immediately stop work, leave personal items behind, and evacuate via designated fire stairwells. Do not use elevators.
- **Assembly Point:** Proceed directly to the primary exterior muster area: **[Designated Evacuation Assembly Area]**. Wardens will perform headcount.
- **First Aid Stations:** Fully equipped First Aid Kits are located in the main kitchen, reception area, and floor corridors. Designated qualified First Aiders are posted on team bulletin boards.

Emergency Services

Police / Fire / Ambulance: [911 / Local Emergency]
Building Security: [Extension / Direct Phone]

Internal Security Escalate

Facility Security Desk: [Internal Phone]
Safety & HR Officer: [Direct Line]

5. SECURITY INCIDENT ESCALATION & RESPONSE

Security incidents must be logged, reported, and investigated systematically to mitigate potential losses or safety risks.

Severity	Incident Example	Action & Escalation
Low	Lost visitor badge, broken door latch, misplaced non-sensitive asset.	Log with Reception / Operations Desk within 24 hours.
Medium	Unescorted intruder, lost access card, unstaffed entry point left open.	Notify Security Team immediately. Re-key/deactivate access cards.
High / Critical	Forced entry, stolen laptop, physical assault, active fire, or severe breach.	Contact Emergency Services first. Notify Executive Team and initiate lock-down.

Post-Incident Investigation: Security conducts a formal root-cause analysis within 48 hours for all Medium and High severity incidents to implement corrective preventive measures.

6. EMPLOYEE POLICY ACKNOWLEDGMENT

By signing below, the employee acknowledges receipt, understanding, and agreement to comply with the Security SOPs outlined above.
